### **Storehouses of Empire: Liverpool's Historic Warehouses**

by *Colum Giles*

Some of the world's great cities are linked in the popular mind with their river and, for reasons both ancient and modern, Liverpool and the Mersey are inseparable. The Mersey formed part of the chain that carried the trade of the world, linking large parts of northern and midland England with markets and sources of supply across the globe. For centuries, this traffic passed through Liverpool, the landing point for imports and the port of dispatch for goods sent overseas or around the coast. Liverpool developed to serve a growing national and international trading network and for many decades handled more of the cargoes of Britain's maritime empire even than London. In Liverpool, the warehouse represents the essential function of the city; nowhere else can the evolution of this important building type be studied in such depth from surviving buildings.

### **Played in Manchester: The Architectural Heritage of a City at Play**

by *Simon Inglis*

Most of the sports played at international level today – including football, cricket, rugby, hockey, tennis, bowls and snooker – were developed and codified in Britain. This book is the first of a series of titles celebrating sport's architectural heritage. Over the last 200 years, the Manchester area has been a leading centre for archery, athletics, cycling, lacrosse and water polo. Its historic buildings include Britain's first purpose-built ice rink, the first greyhound stadium and the earliest known examples of Lads' Clubs, the forerunners of today's youth centres. The book includes a trail of fascinating locations: a Victorian real tennis club hidden in the backstreets of Salford, an Edwardian billiard room, the training ground where Manchester United's Bobby Charlton and David Beckham honed their skills, a former

racecourse grandstand now used as a student union and, not least, the opulent Victoria Baths, winner of last year's BBC Restoration series.

### **Licensed to Sell: History and Heritage**

by *Geoff Brandwood*

Since the 1960s, major changes have left less than 4% of pub interiors of any historic value. This book focuses on what can still be seen of our once-rich pub heritage. It describes how the long history of the pub, and changing attitudes towards it, are reflected in its design and planning, and how it was organised to serve and entertain the customer. It also deals with the often magnificent embellishment of pubs with ornamental glass, tilework and carved wood in the golden age of pub building around 1900. It contains over 150 photographs of pub interiors as well as plans illustrating the development of the public house through the ages.
