

FRONT OF THE BUILDING

HOW TO MAKE YOUR MODEL OF THE SAXON THEGN'S HOUSE

Print and cut out the four templates. Ask a grown-up to help if you need. Then glue the two walls together to make one long piece and fold along the dotted lines to create a rectangle. Stick this together using the tab at the side. Next, take the roof and fold it in half along the dotted line. Stick this onto the tabs at either end of the walls and you've finished the hall!

To create the tower, fold the top down to create a lookout area. Then put glue on the tabs, and fold the lookout floor down so it 'sits' on these tabs. Lastly, glue the edge of your tower together to finish.
