

## BEESTON ROUNDHOUSE

Print and cut out both of the templates. Add glue to the tab on the roof, then fold round and secure. The wooden struts go at the back of the roundhouse. Add glue to the end tab of the wall and join the two ends of the wall together. Add glue to the top three tabs of the wall and attach to the inside of the roof, positioning the fire at the front of the roundhouse where the roof curves upwards.
