

The Ammonite Quest

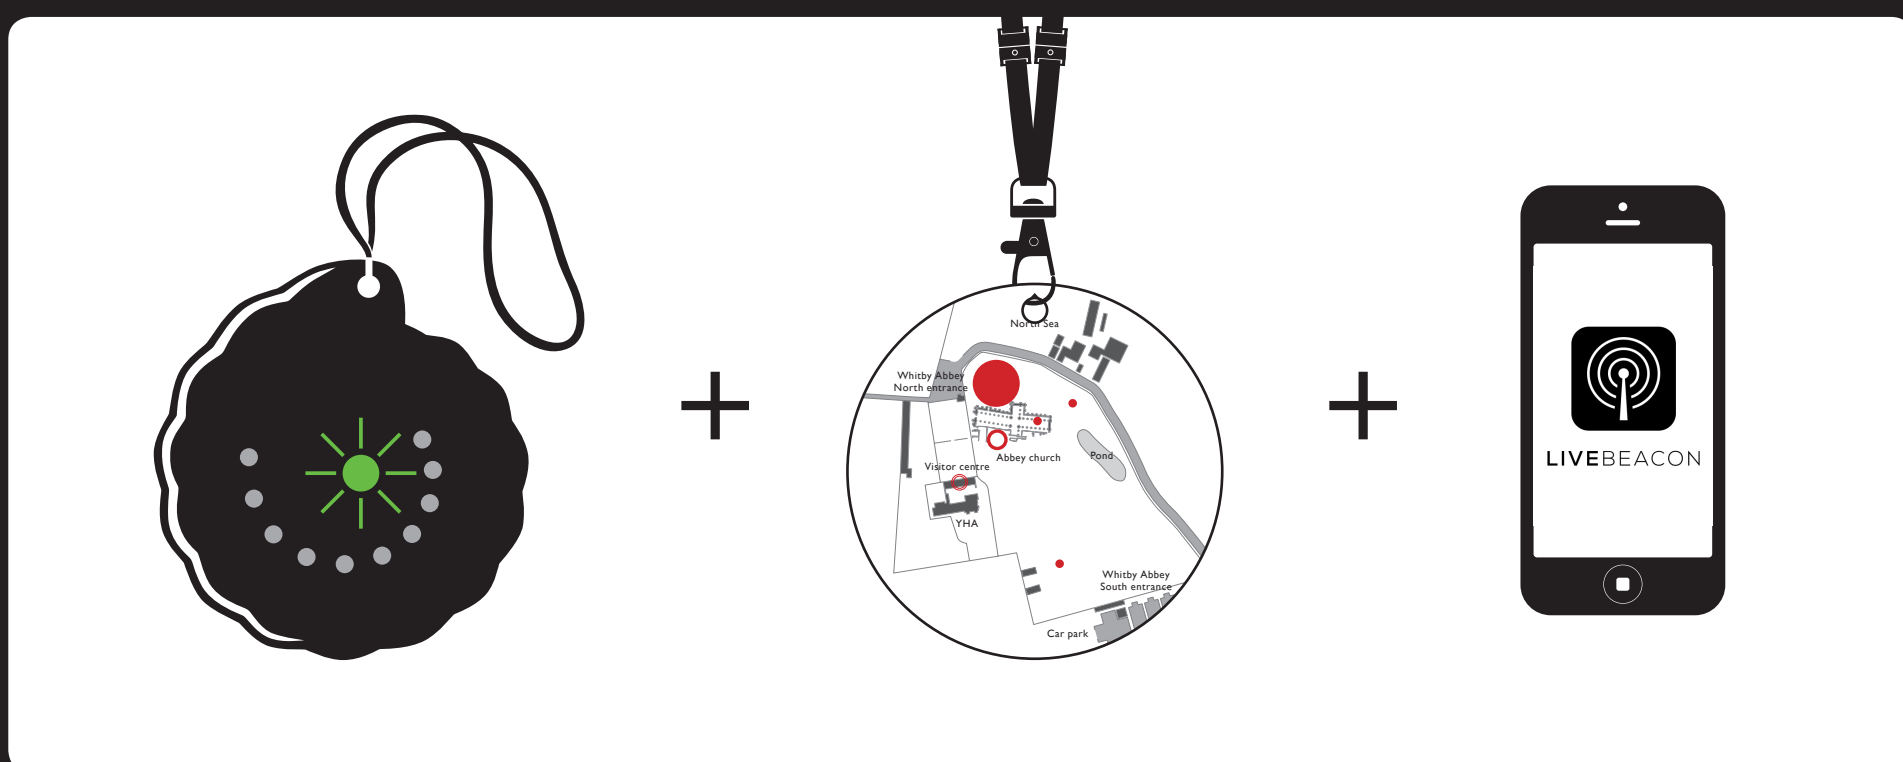

1 Explore, find and discover the hidden history of Whitby Abbey.

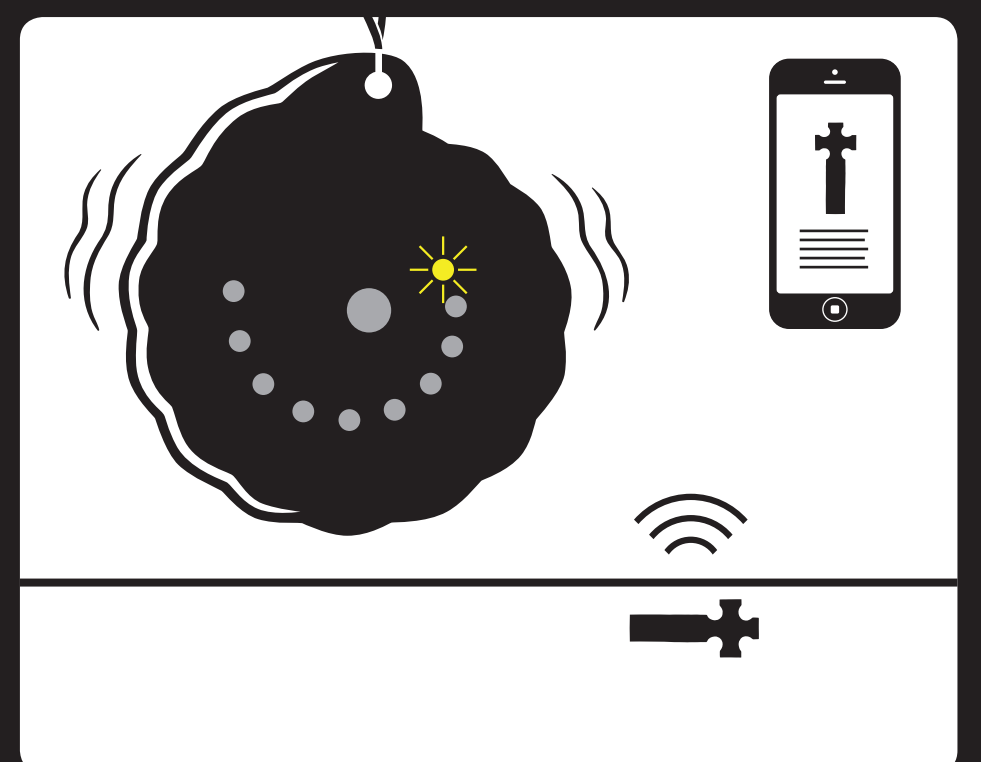

2 Work as a team and discover where we found some of the objects, which are now on display in the museum, and where some of the lost buildings once stood.

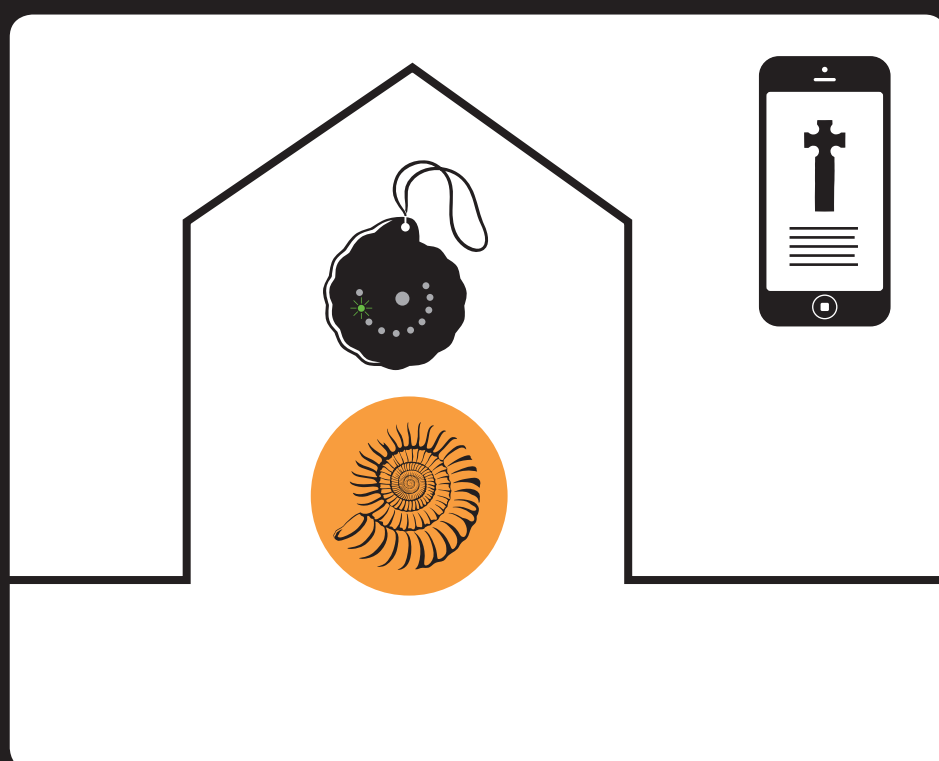

3 Download the Live Beacon app for free to your mobile device. The app will reveal information about some of the objects and lost buildings you can discover here today.

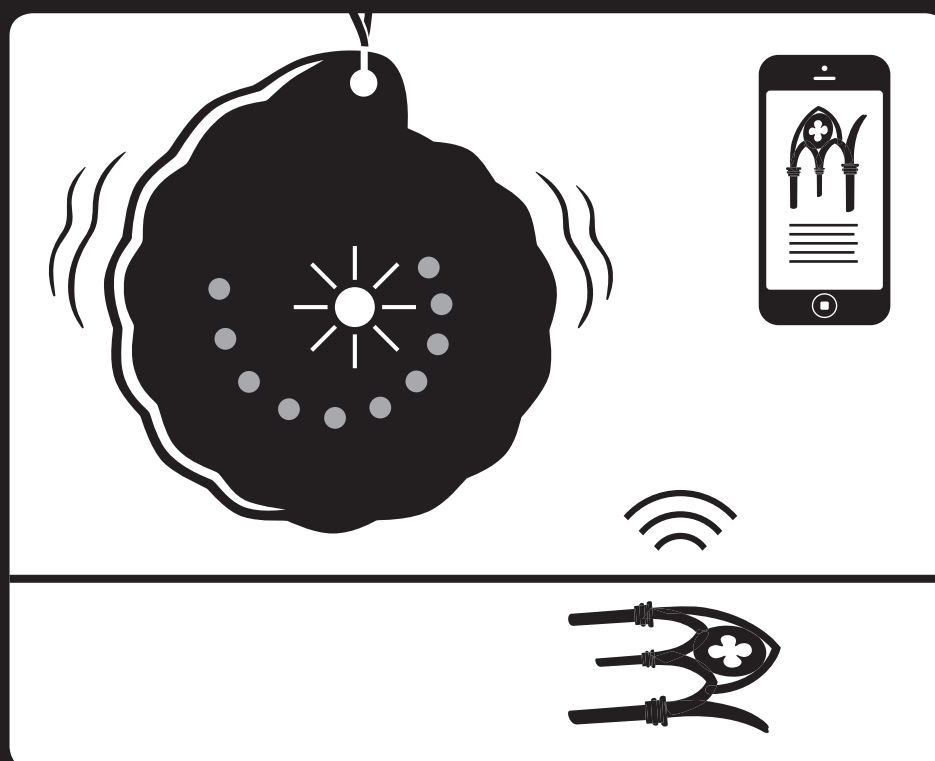

4 Collect your ammonite device and lanyard. The lanyard contains information about the search areas, objects and lost buildings. Together with the Live Beacon app you can begin your quest.

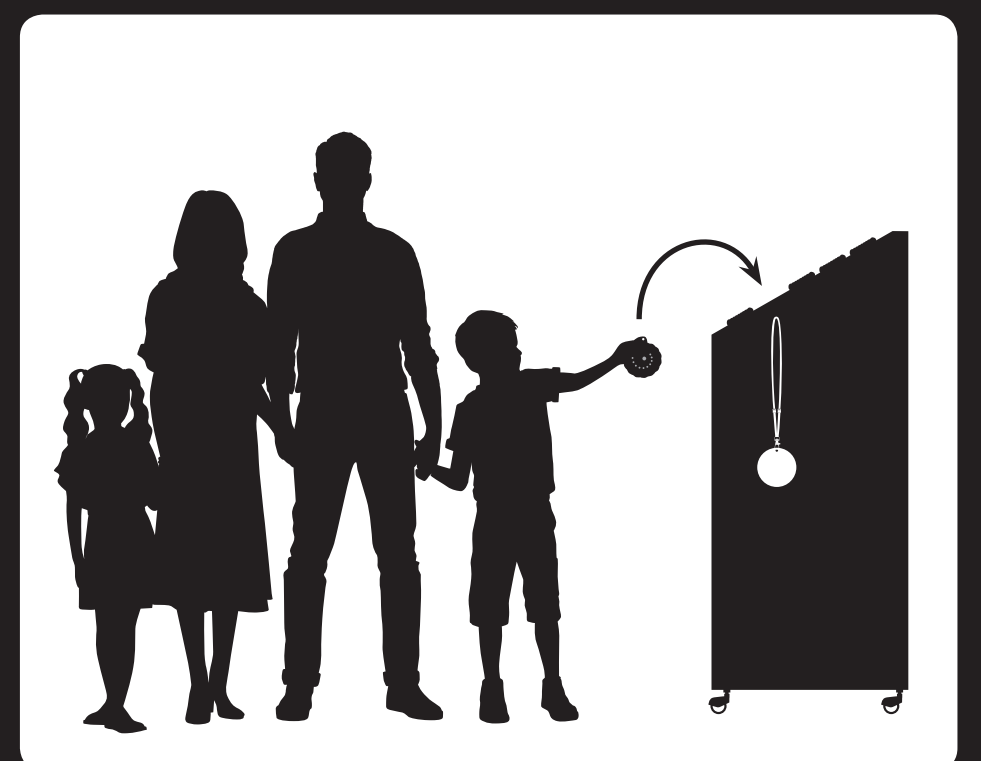

5 **EXPLORE...**The coloured lights on the ammonite device illuminate when you are close to where an object was found on the abbey site. You will also feel a beat. Use your lanyard and the Live Beacon app to identify what you have found.

6 **FIND...**Coloured lights on the ammonite device will flash when you have found one of the objects in the museum. You will also feel a beat. Look for the copper ammonites to help you identify them.

7 **DISCOVER...**The white light in the centre of the ammonite device will illuminate when you are near a lost building on the abbey site. You will also feel a beat. Trace the outline of the lost buildings beneath your feet.

8 When you have completed your quest, return your ammonite device and lanyard to the museum.

The ammonite devices are alarmed and will lose power if removed from site.
